

State Project Nos. H.006138.5 & H.009187.5
F. A. P. Nos. 2606(510) & H009187
Off-System Highway Bridge Program
Jefferson Parish

Q. Were preliminary plans designed by another consultant?

A. Yes, preliminary plans, survey, and hydraulics were completed by Atlas Engineering with BFM Corporation as the sub-consultant for the survey work.

Q. The Minimum Personnel Requirements call for having a Professional Land Surveyor. What portion of the scope will require a PLS?

A. It is anticipated that some field verification of the existing survey will be required, thus the need for a PLS. Man-hours have been included in the fee for this work.

Q. Are electronic files for the preliminary plans available?

A. Yes. Microstation DGN files are available on disc.

Q. Will there be a need for an environmental professional?

A. No. The NEPA process has been completed and the project is cleared.

Q. Where are these structures located?

A. H.006138.5 – Poplar Street over Bonnabel Canal, just north of Esplanade.
H.009187.5 – 23rd Street Bridge over Canal No. 17 (Butler), just north of the west end of the New Orleans International Airport in Kenner.
